Species			Population in the site							Site assessment				
G	Code	Scientific Name	S	NP	T	Size		Unit	Cat.	D.qual.	A B C D		A B C	
						Min	Max				Pop.	Con.	Iso.	Glo.
B	<a href="#">A392</a>	<a href="#">Phalacrocorax aristotelis desmarestii</a>			r	20	30	p						
B	<a href="#">A464</a>	<a href="#">Puffinus yelkouan</a>			r	300	1000	i						

**Group:** A = Amphibians, B = Birds, F = Fish, I = Invertebrates, M = Mammals, P = Plants, R = Reptiles  
**S:** in case that the data on species are sensitive and therefore have to be blocked for any public access enter: yes

**NP:** in case that a species is no longer present in the site enter: x (optional)

**Type:** p = permanent, r = reproducing, c = concentration, w = wintering (for plant and non-migratory species use permanent)

**Unit:** i = individuals, p = pairs or other units according to the Standard list of population units and codes in accordance with Article 12 and 17 reporting (see [reference portal](#))

**Abundance categories (Cat.):** C = common, R = rare, V = very rare, P = present - to fill if data are deficient (DD) or in addition to population size information

**Data quality:** G = 'Good' (e.g. based on surveys); M = 'Moderate' (e.g. based on partial data with some extrapolation); P = 'Poor' (e.g. rough estimation); VP = 'Very poor' (use this category only, if not even a rough estimation of the population size can be made, in this case the fields for population size can remain empty, but the field "Abundance categories" has to be filled in)

### 3.3 Other important species of flora and fauna (optional)

Species	Population in the site	Motivation

Group Species	CODE	Scientific Name	S	NP	Size Population in the site		Unit	Cat.	Species Motivation categories

<b>CODE:</b> for Birds, Annex IV and V species the code as provided in the reference portal should be used in addition to the scientific name					Min	Max	C	R	V	P	IV	V	A	B	C	D

**S:** in case that the data on species are sensitive and therefore have to be blocked for any public access enter: yes

**NP:** in case that a species is no longer present in the site enter: x (optional)

**Unit:** i = individuals, p = pairs or other units according to the standard list of population units and codes in accordance with Article 12 and 17 reporting, (see [reference portal](#))

**Cat.:** Abundance categories: C = common, R = rare, V = very rare, P = present

**Motivation categories:** **IV, V:** Annex Species (Habitats Directive), **A:** National Red List data; **B:** Endemics; **C:** International Conventions; **D:** other reasons

## 4. SITE DESCRIPTION

### 4.1 General site character

[Back to top](#)

<b>Habitat class</b>	<b>% Cover</b>
<b>Total Habitat Cover</b>	0

### Other Site Characteristics

This site, located along the eastern coast of Agio Oros Peninsula encloses a 1 n.m. marine extension from Cape Araplis at the northern-most part of Mount Athos Peninsula up to Cape Timlou Prodomou at the eastern-most end of the peninsula. It includes vital foraging and resting areas for the local population of the Mediterranean Shag breeding along the eastern coast of the peninsula, as well as Important foraging areas for the Yelkouan Shearwaters. Significant Yelkouan Shearwater foraging areas, which are associated with rich fishing grounds of the Thracian Sea, also extend towards Thasos Island and the Gulf of Kavala, beyond the current boundaries of the site.

### 4.2 Quality and importance

The area is of particular importance for the 20-30 pairs of Mediterranean Shag breeding along the coast and the Yelkouan Shearwaters which feed in the area, primarily during the breeding season. It is estimated that up to 1,000 Yelkouan Shearwaters regularly feed within the area. Up-to-date, no large Yelkouan Shearwater colony has been discovered in the area suggesting that these birds come from colonies in the wider area of the Northern and potentially Central Aegean Sea. Similarly, large Yelkouan Shearwater foraging congregations have been recorded in other nearby marine areas, such as around Thasos island and the Gulf of Kavala to the northeast, as well as the southern and eastern coast of Sithonia Peninsula to the south.
