

Stanley A. Schumm

River Variability and Complexity

CAMBRIDGE

Contents

| | |
|--|---------|
| Preface | page ix |
| Acknowledgments | xi |
| <hr/> | |
| Part I Background | |
| Chapter 1 Introduction | 3 |
| Chapter 2 Types of rivers | 9 |
| Chapter 3 Non-regime channels | 18 |
| <hr/> | |
| Part II Upstream controls | |
| Chapter 4 History | 39 |
| Chapter 5 Tectonics and relief | 50 |
| Chapter 6 Lithology | 59 |
| Chapter 7 Climate: hydrology | 64 |
| Chapter 8 Humans | 79 |
| <hr/> | |
| Part III Fixed local controls | |
| Chapter 9 Bedrock: alluvium | 97 |
| Chapter 10 Tributaries | 104 |
| Chapter 11 Active tectonics | 108 |
| Chapter 12 Valley morphology | 118 |
| <hr/> | |
| Part IV Variable local controls | |
| Chapter 13 Floods | 127 |
| Chapter 14 Vegetation | 133 |
| Chapter 15 Accidents | 138 |
| <hr/> | |
| Part V Downstream controls | |
| Chapter 16 Base-level | 149 |
| Chapter 17 Length | 156 |
| <hr/> | |
| Part VI Rivers and humans | |
| Chapter 18 Applications | 163 |
| Chapter 19 Some unintended consequences | 173 |
| Chapter 20 River impact on ancient civilizations: a hypothesis | 182 |
